Less Means BETTER! Less Resources, Less Waste, Less Emissions!

Outdoor Game

Silesian
Voivodeship

Integrated LIFE project "Silesia. Blue Sky Restored". Comprehensive implementation of the Air Quality Plan,
for the Silesian Voivodeship. LIFE20 IPE/PL/000007 - LIFE-IP AQP-SILESIA-SKY

"Less Means BETTER! Less Resources, Less Waste, Less Emissions!" Outdoor Game

When: 21 June 2025, 16:00 - 19:00

Where: Dankowice Drugie 30, Krzepice

Who: **Dominika Bukalak-Gaik**, co-ordinator of the Northern Subregion of the Silesian Voivodeship

Joanna Grzyb, eco-manager of the Municipality of Krzepice

Can you navigate through the world of the circular economy? Do you know what happens to waste after you throw it in the bin? The family-friendly outdoor game "Less Means BETTER! Less Resources, Less Waste, Less Emissions!" is a great opportunity to test your navigation skills and environmental knowledge!

Participants will embark on an interactive route, searching for hidden challenge points and solving puzzles related to the circular economy. Every correct answer will bring them closer to discovering the final phrase and earning the title of eco-thinking champion!

Waste is not the end – discover the second life of materials

During the game, participants will learn that waste is not useless garbage but a valuable resource that can be reused. They will understand the importance of reducing resource consumption and how recycling helps protect the environment.

Save resources – minimize waste

The route will feature tasks focusing on waste reduction, renewable materials, and product reuse. Participants will discover why durable products are a better choice, how conscious consumption makes a difference, and why repairing is better than discarding.

The impact of waste on the environment and air quality

The game will illustrate how poor waste management—including burning waste at home—affects air quality and public health. Participants will learn that reducing greenhouse gas emissions starts with responsible resource management.

Education meets fun

This game combines active fun with practical environmental education. Teams will need to collaborate, analyze information, and apply their knowledge to complete all challenges and succeed in their eco-missions. Each family team will receive a map marking the locations of challenge stations. After completing all tasks and solving the puzzles, participants will uncover the final phrase, summarizing their new knowledge.

A game with a lasting impact

It's not just a one-time adventure—the knowledge gained will help participants apply circular economy principles in their daily lives. Because less means better—for the environment, for air quality, and for all of us!

This event is organized as part of the LIFE project "Silesia. Blue Sky Restored."
